

## MANUSCRIPT TRANSFER POLICY

Manuscript transfer allows submissions that are rejected by one journal to be forwarded to another journal for consideration. The process is author-driven, meaning that authors decide whether to transfer their manuscript to a second journal.

In cases where a manuscript is not accepted by *JID*, the Editor may offer authors the option to transfer their submission to *JID Innovations (JIDI)*, its sister publication. *JID Innovations* is an online-only Open Access journal that provides an international forum for the rapid and open publication of high-quality, peer reviewed research in the field of skin biology and disease. *JID Innovations* features original scientific reports related to all aspects of skin science from molecular studies to population health, including studies addressing the pathogenesis and treatment of skin diseases. *JID Innovations* articles should address questions that are important and relevant to the community of researchers and clinicians focused on skin biology and disease. Submissions may confirm or challenge current knowledge, inform the community of a new technology or resource, advance a new hypothesis, or challenge existing paradigms (see editorial). This invitation will appear in the *JID* rejection letter. The authors may accept or decline this invitation to transfer the submission, using an embedded link in the decision letter. Authors are asked to respond to this invitation within 30 days. If the authors agree to the transfer, the manuscript files, any reviews, reviewer identities, editor comments, and the decision letter will be shared confidentially with the *JIDI* Editorial Board.

If the authors wish to appeal the rejection of their manuscript by *JID*, this should be completed BEFORE transferring the submission to *JID Innovations*.

Manuscript transfer minimizes the burden on authors after a manuscript has been rejected. Most manuscripts transferred from *JID* to *JIDI* will require no alteration by the authors to be considered by *JIDI*. The author account is the same for *JID* and *JIDI*, and both journals conduct peer review from the site. Upon receipt, the transferred manuscript will be assigned a new manuscript number by *JIDI*.

Manuscript transfer saves time in review, meaning a decision is rendered sooner and accepted work can be published more quickly. *JID* and *JIDI* are committed to rigorous, timely, and fair peer review. The journals are also committed to ensuring reviewers' contributions are maximized and avoiding reviewer fatigue. In most cases, the *JIDI* Editor will make a first decision based on transferred reviews, meaning that a decision could be made within one week of receipt. Additional reviewers will be invited at the Editor's discretion, which may extend the time in review. In the case of editorially rejected *JID* submissions, *JIDI* may invite external reviewers before making a decision; in this case the peer review will take longer. All decisions on manuscripts transferred to *JIDI* will be based on *JIDI's* scope and its Editorial Board's independent evaluation of the reviewer comments. To ensure editorial consistency,

the Editors hope that the original *JID* reviewers will be willing to review future revisions for *JIDI*, should the journal request revisions by the authors. To avoid burdening reviewers, *JIDI* will make every effort to handle revisions editorially rather than request multiple rounds of review by external reviewers. When additional input is desired from previous reviewers of transferred submissions, these reviewers will be *invited* to review the revised submission (i.e., the manuscript will not be returned to these reviewers automatically for re-review). *JIDI* will maintain all *JID* confidentiality policies related to submitted reviews and reviewer identities.

Note: For accepted manuscripts, the official “submitted” date will be the transfer received date.
